

ENDECK™ DECKING

Boat Docks, Marinas & Boardwalks

Walking the Plank has Never Felt So Good!

Advance to the Next Generation Capped Cellular Decking with Endeck™

ENDECK®
PVC DECKING

Endeck™ Loves Water, it can Even Float!

Not only does Endeck provide homeowners with a beautiful and long lasting deck, but it also works great for Docks, Marinas, and Boardwalks!

Whether you are in salt water climates or inland near lakes and streams, Endeck will provide a gorgeous textured slip resistant deck, dock, boardwalk, or marina for the ultimate enjoyment without the hassles of maintenance.

What typically destroys wood and composite decking creating mold, mildew, warping, and decay, will not damage Endeck decking which is unaffected by moisture and will keep looking great year after year.

What you need to know about Endeck:

- Endeck is light (1.55 lb. per sq. ft.) and ideal for removable and fixed docks
- Minimal thermal expansion resulting in no warping or buckling
- Impervious to water and will not shrink, swell or twist
- Flexible installation, works with multiple fastening systems
- Doesn't retain heat as does wood and composite deck boards
- Will not leach chemicals or by-products into the ecosystem
- Forest Series has a 30 Year Fade and Stain Warranty
- Tested and Code approved to the exacting CCRR-0144
- Woodland Series Flame Spread's past testing far exceeded the industry's requirement of 200 by 90%
- Deep embossing provides a surface with excellent traction wet or dry
- Because Endeck is 100% PVC, it is completely recyclable unlike composites or wood
- Endeck decking is compatible with all types of support sub systems and railings, including aluminum, steel and wood to name just a few

Endeck Woodland™ Series

Making decks and docks better, with lower maintenance, and beautiful finishes, Woodland™ Series decking offers soft earthy hues and is a favorite amongst coastal communities

Endeck captures the classic look and feel of real wood, but leaves the headaches and extra maintenance time and expense behind. The textured wood grain on both sides of Endeck's capped cellular PVC deck boards mimic the look and feel of real wood.

Tough Inside and Even Tougher Outside

Endeck Woodland Series boards are strong, durable, engineered to resist sagging, and lighter in weight than composite, capped composite or treated wood deck boards. Endeck boards meet or exceed stringent AC174 standards, are CCRR-0144 approved, and safe - with a flame spread rating 10 times better than required.

Beechwood

Olivewood

Endeck FOREST™ Series

The deep, rich colors of Endeck Forest™ Series lend a natural beauty that is only found on the most expensive, exotic hardwoods

And, even though the colors run dark, Endeck manufacturing technology allows the decking underfoot to remain comfortable, and cooler to the touch—even on the hottest days. The impressive 30 Year Fade and Stain Warranty offers additional peace of mind and long term sustained beauty.

Endeck employs our exclusive HardCover™ Capstock, a higher performance outer surface delivering unmatched durability and ultra-low maintenance

With an unmatched ability to resist stains and fading, Endeck Forest Series decking is sure to provide many years of worry-free enjoyment, even in high traffic areas. Our process allows for a rough sewn textured plank with subtle color variations as random as those found in nature.
